P03 React (part 2)

1

Add event handling and a *Reset* button to your *Connect-Four* game. The game should be playable now. Optional: Add a function that finds out whether a player has won.

2

Recommended, useful for quick demonstrations: Create a standalone version of your project (just one file with libraries from CDN or local, like the demo files shown in the lecture).

Mobile Project

If one of the technologies you chose for the project is React.js: Start developing the first Mobile Search Application. Develop the layout for all pages and start implementing the GUI part for them.
